Bodies Accumulating.

HAMBURG, Sept. 1.—The air is cooler ordiock this morning. Reports to the board of health show the devolopment of 713 fresh cases and 267 deaths. This is a decrease since yesterday of ninety-seven in the number of cases developed and of forty-three in the number of and of forty-three in the number of deaths. The people of the city feel no encouragement, however, to expect on this account the immediate abstement of the disease. So many hopes have been raised by official announcements in the last week, only to be shattered within the next twenty-four hours, that confidence is entirely gone.

The paint seems to have complete pos-The panic seems to have complete possession of the city. Everybody who can is leaving or preparing to leave. Several keepers of the largest hotels contemplate closing their houses should the plaque be at the present height on Sunday.

Shops are closing by the score, either because cholera has appeared among the employes, or because the proprietors have feared to remain in town to conduct their business. No accurate estimate of the numbers leaving the city daily is to be had, but they are now well up in the thousands. Rallways running to

An extraordinary effort was made to-day to remedy the perilous condition of affairs, and 305 burials have been made against 290 yesterday; but the increase of mortality, as the result of bad weather yesterday and last night, has counter-balanced the exertions of the authorities.

The physicians of the city are terri The physicians of the first were served by overworked, and many have been obliged to give up their duties temporarily that they may rest. Those attached to the health board are completely exhausted, and to-day the board issued a call for 120 more to relieve the issued a call for 120 more to "nieve the present force, which has worked steadily day and night for the last week. The government is said to be threatened with difficulty in handling the mails, as several circles and postmen have developed symptoms of the cholera to-day, and a panic seems imminen

among them.
The most remarkable change that has ever come over the city is remarked at the docks along the harlor. All the excursion steamers and small pleasur excursion steamers and shint present craft its idle and deserted. The salling craft which touch here irregularly and line the water front with their spars are almost totally lacking. Only a few of the large steamships which run to ports along the German coast continue uninterrupted in their trade The dockers have little or no employment dockers have little or no employment and most of them have no mency for their families. TIME TO CONSIDER.

Arrival of Asiatic Cholera at the Port of New York.

SHALL IMMIGHATION BE SUSPENDED?

World's Fair Under Discussion, and the Deferring of the Monetary Conference & Possibility.

WASHINGTON, Sept. 1.—The actual arrival of Asiatic cholera at the port of New York has brought to the front the question of suspending immigration to this country altogether during the prevalence of cholera in the eastern hemisphere. It is admitted that such a measure would be justified only by the most pressing danger, but this danger in the opinion of some high officials, is at hand. Government officers are rantaking records and reading up on for ner scourges. Assistant Secretary Spaulding, wh

has immediate control of the matter, was yesterday afternoon found deeply immersed in a history of the smallpox of the government is at work on this cholera business." he said, "and all the mathematical the said of the government is at work on this cholera business." he said, "and all the said of the said

immersed in a shistory of the smarthox epidemic in 1885. "All the machinery of the government is at work on this cholers business." he said, "and all the precautions taken in 1885 have already been taken by us."

Continuing, Mr. Spaulding said that under existing quarantine laws such restrictions could be imposed that would practically suspend immigration, but he would not say that such action was immediately contemplated. An eminent law officers of the government, who has given the subject much thought, said that in his opinion the president had the power to sasthe president had the power to sus-pend all immigration if, in his judgment, deemed necessary for the pr wolfare, while the scourge lasted. This

opinion is entertained by others.
Senator Cullom does not see any no Senator Cullom does not see any nocessity for calling a special session of
congress to attain this end. He says:
"If the health officers of the country
do their duty—and they seem to be
vigilant—we can keep the cholera out.
Should there be promise of a great
prevalence we might be compeled to
resort to heroic measures, but I fail to
see any reason why we should do so at
this time. Our officials have ample
power to quarantine passengers and to
prohibit the landing of suspicious cargrees.

Every day's news seems to add to the gravity of the situation and to suggest new and far-reaching consequences. The question of postponing the World's fair is now being discussed. It is pointed out by treasury officials that most of the exhibits will necessarily come from cholera-infected countries, and that the fair would consequently serve as a great propagating garden for the dissemination of the disease. Then, too, it is urged that the practical renoval of all the customary restriction for importations of goods intended for the World's fair would make such im-portations doubly dangerous as disease-

A postponement of the monetary conerence on account of the cholera is ference on account of the cholera is also more than a possibility.

As to the condition of affairs at Liverpool, Surgeon General Wyman received a cablegram yesterday from Consul Sherman as follows: "All steerage passengers sailing to-day efficiently quarantined before embarking. All clothing and lagrage thoroughly dis-

out pain or griping. They are in a form of a gumdrop. They dothing and baggage thoroughly disinfected by sulphur process. Passengers already embarked pronounced perfectly safe by local authorities, who are thoroughly alive to danger and taking vigorous measures to prevent any outbreak."

THE STATE CAMPAIGN.

Dozen of Them-Pansy......Aide Illinois.

> Held in Chicago-Notes. The Illinois Republican State Committee held one of its most important meet-ings of the campaign in Chicago yesterday. Most of the committeemen were present when Chairman Clark calle them together at the Grand Pacific at 10 o'clock, and John R. Tanner, "Long" Jones, ex-Congressman B. F. Marsh and other leaders were also present ready with advice and counsel. The first business transacted was the preparation of (list of thirty-five speakers of national to come to the state and make from one to four speeches each in September and This list was telegraphed to day. It appears that there was a confusion of orders or a dispute as to which train had mile from the town the collision occurred. The greatest confusion ensued and all on both trains believed that something worse than cholers was coming. The shock of the colliding engine was terrific. Both were badly broken and the baggage cars in each train were split and splintered. The firemen of the special and Mark Killeins of Bement, were severely bruised, but fortunately no one was killed. All of the passengers were shaken up, and thrown about in he conches, but saide from slight bruises and onto there was little to kick about except the blunder of somebody to try to

Now is the time to buy them, and we want to especially recommend John Mundell's Solar Tip Shoes. They will outwear several ordinary shoes for the reason that the sole leather is brought up and bent over in front making it almost impossible to wear the shoe out at the toe. These shoes are in goat, grain and dongola stock and are just what is wanted for school wear. We are exclusive agents for them, own them cheaper than any retailer can, and can sell them for the least money.

Here's What the Plasterers Think of ROCK PLASTER.

WE THE UNDERSIGNED, contracting plasterers, after much experience and observation, take pleasure in testifying to the practical character of ROOK PLASTER, and while it will remove a not inconsiderable amount of business, namely that of patching, we advocate its use, as it enables us to do work and guarantee the results, and enables us to carry on our trade at all seasons of the year, and modernizes that part of building enterprise which has undergone practically no improvement in the last two thousand years, placing the business of the plasterer on the same footing as that occupied by the other trades through the advent of machinery and improved methods.
